

ELSEVIER

Comput. Methods Appl. Mech. Engrg. 140 (1997) 413–414

**Computer methods
in applied
mechanics and
engineering**

Contents Volume 140

Volume 140, Nos. 1–2, 15 January 1997

Pollution error in the h -version of the finite element method and the local quality of the recovered derivatives

I. Babuška, T. Strouboulis, S.K. Gangaraj and C.S. Upadhyay 1

Reducing spurious dispersion, anisotropy and reflection in finite element analysis of time-harmonic acoustics

I. Harari 39

A mixture theory for contact in multi-material Eulerian formulations

D.J. Benson 59

Consistent finite element structural analysis and error control

A.J. Morris and R. Vignjevic 87

New models for optimal truss topology in limit design based on unified elastic/plastic analysis

R. Muralidhar and J.R.J. Rao 109

Three-dimensional solution for simply-supported piezoelectric cylindrical shell for axisymmetric load

S. Kapuria, S. Sengupta and P.C. Dumir 139

On the construction of essentially non-oscillatory finite volume approximations to hyperbolic conservation laws on general triangulations: polynomial recovery, accuracy and stencil selection

T. Sonar 157

The Babuška–Brezzi condition and the patch test: an example

I. Babuška and R. Narasimhan 183

Volume 140, Nos. 3–4, 30 January 1997

Temporal, spatial and thermal features of 3-D Rayleigh–Bénard convection by a least-squares finite element method

L.Q. Tang and T.T.H. Tsang 201

A new family of exponential infinite elements for the analysis of lossless electromagnetic waveguides

A. Toselli 221

Limit state solutions, based upon linear elastic solutions with a spatially varying elastic modulus

A.R.S. Ponter and K.F. Carter 237

Shakedown state simulation techniques based on linear elastic solutions <i>A.R.S. Ponter and K.F. Carter</i>	259
Treatment of initial deformations in the Integrated Force Method <i>I. Kaljević, S.N. Patnaik and D.A. Hopkins</i>	281
A stable Petrov–Galerkin method for convection-dominated problems <i>R.C. Almeida and R.S. Silva</i>	291
Equilibrium subsets for multi-parametric structural analysis <i>A. Eriksson</i>	305
A discrete formulation for elastic solids with damaging interfaces <i>G. Bolzon and A. Corigliano</i>	329
An Eulerian approach for large displacements of thin shells including geometrical non-linearities <i>I. Arregui, P. Destuynder and M. Salaün</i>	361
A three-dimensional free vibration analysis of cross-ply laminated rectangular plates with clamped edges <i>J.Q. Ye</i>	383
Solution of discontinuous interior Helmholtz problems by the boundary and shell element method <i>S.M. Kirkup</i>	393
